

# Rules on letting this property

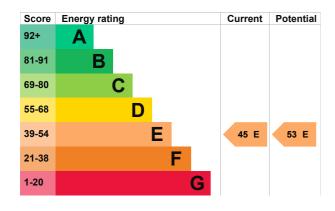

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (<a href="https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance">https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</a>).

# **Energy rating and score**

This property's energy rating is E. It has the potential to be E.

<u>See how to improve this property's energy efficiency.</u>

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

## Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                 | Rating    |
|----------------------|---|-----------|
| Walls                | Average thermal transmittance 0.24 W/m²K    | Very good |
| Roof                 | Average thermal transmittance 0.18 W/m²K    | Good      |
| Floor                | Average thermal transmittance 0.16 W/m²K    | Very good |
| Windows              | Fully double glazed                         | Good      |
| Main heating         | Boiler & underfloor, electric               | Very poor |
| Main heating control | Time and temperature zone control           | Very good |
| Hot water            | From main system, plus solar                | Average   |
| Lighting             | Low energy lighting in 88% of fixed outlets | Very good |
| Secondary heating    | Room heaters, dual fuel (mineral and wood)  | N/A       |
| Air tightness        | (not tested)                                | N/A       |

### Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

Solar water heating

### Primary energy use

The primary energy use for this property per year is 233 kilowatt hours per square metre (kWh/m2).

## How this affects your energy bills

An average household would need to spend £1,637 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £-1 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2016** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 9,445 kWh per year for heating
- 2,083 kWh per year for hot water

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### Carbon emissions

An average household produces

6 tonnes of CO2

This property produces 5.7 tonnes of CO2

This property's 4.6 tonnes of CO2
potential production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Changes you could make

Step Typical installation cost Typical yearly saving

1. Solar photovoltaic panels £5,000 - £8,000 £311

### Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

## Who to contact about this certificate

## **Contacting the assessor**

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | Joe Solti             |
|-----------------|-----------------------|
| Telephone       | 01903 884 357         |
| Email           | joe@thermenergy.co.uk |

### **Contacting the accreditation scheme**

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme                  | Stroma Certification Ltd |
|---------------------------------------|--------------------------|
| Assessor's ID                         | STRO003946               |
| Telephone                             | 0330 124 9660            |
| Email <u>certification@stroma.com</u> |                          |
| About this assessment                 |                          |
| Assessor's declaration                | No related party         |
| Date of assessment                    | 5 July 2016              |
| Date of certificate                   | 5 July 2016              |
| Type of assessment                    | SAP                      |
